

Confirmation of Commitment Letter

Hazardous Materials

***For renovation, addition and alteration projects.
* To be signed by the Owner or Owner's Agent.***

Date

Subject Property Address

Project Description

I, _____, confirm:
(subject property Owner or Owner's Agent*),

The above described project includes buildings or structures constructed prior to 1990. A licensed asbestos abatement contractor will prepare a hazardous materials (or hazmat) survey, which will be submitted to the District of West Vancouver Permits and Inspections Department **prior to scheduling any site inspections**.

Should the hazmat survey identify the presence of hazardous materials, remedial work will be carried out followed by the issuance of a post-abatement clearance letter confirming that the site is safe for workers to enter in conformance with WorkSafeBC Health and Safety Regulations. Further to this, I understand that if the site is not formally cleared as *safe for workers to enter*, inspection requests may be declined.

Signature: _____
(Subject Property Owner or Owner's Agent*)

Print name: _____
