- Property Not On File

Fuel/Oil Tank Status

- Removed
- Decommissioned in place
- Metal Detection – No tank detected
- Tank Still In Use

CONTRACTOR NAME/COMPANY:
ENGINEER:
SCIENTIFIC SOIL ANALYSIS RESULTS PERFORMED & RECEIVED:
NOTES:

In 1988/1989 West Vancouver Fire & Rescue performed a door-to-door survey of all homes in West Vancouver with fuel/oil tank installation records. Some records are the result of actual dip tests while others were based on verbal statements from the property owners.

Fire department fuel/oil tank records are gathered from different sources and are for information purposes only and should not be relied on for any purchase decision for any property. Unless the Fire & Rescue Department is in possession of a completed West Vancouver Fire & Rescue Fuel/Oil Tank Closure Report, we cannot confirm the status of the Fuel/Oil Tank. The District of West Vancouver assumes no liability for soil conditions at the property due to fuel/oil tank leakage. Finally, West Vancouver Fire & Rescue assumes no liability for any inaccurate or incomplete information, nor for any actions taken in reliance thereon.

We recommend contracting the services of a professional metal detectionist to survey the property to verify or negate the existence of an oil tank. If a fuel/oil tank is located, a permit is required from West Vancouver Fire & Rescue to remove or decommission the tank.
